**INVESTMENT AND ASSOCIATED RISKS AND OTHER INFORMATION CONCERNING
THE UNDERLYING (Index Linked Notes only)**

The Issuer may redeem the Notes on the Optional Redemption Date. If the Issuer chooses to redeem the Notes, the Noteholders are entitled to receive the Optional Redemption Amount by a cash settlement on the Optional Redemption Date. Under these Notes, the Noteholders will not receive any coupons during the term of the Notes. At maturity, the Noteholders are entitled to receive, in addition to 100% of Specified Denomination (the « Minimum Redemption Amount »), an amount totally linked to the performance of the Underlying(s). The return under these Notes is totally linked to the performance of the Underlying(s): the higher the performance, the higher the return. The return of these Notes is linked to the performance of the Underlying(s) as calculated on pre-determined Valuation Dates, and regardless of the level of such Underlying(s) between these dates. As a result, the Closing Price of the Underlying(s) on these dates will affect the value of the Notes more than any other single factor. Under these Notes, at maturity, the Noteholders will receive at least 100% of Specified Denomination. The Notes are different from conventional debt securities in that there will be no periodic payment of interest on the Notes, and the effective yield to maturity of the Notes based on the Minimum Redemption Amount may be less than that which would be payable on such a conventional debt security. Noteholders should realize that the return of only the Minimum Redemption Amount at maturity will not compensate for any opportunity cost implied by inflation and other factors relating to the time value of money.

Pursuant to the provisions of the Equity Technical Annex, upon the occurrence of certain Extraordinary Events and Adjustments affecting the Underlying, the Calculation Agent may decide an Early Redemption of the Notes on the basis of Market Value.
